DESCRIPTION

The quality of the Excalibur begins in the engineering of the car from the ground up. The Excalibur is built using completely new parts.

The frames are made from rugged and corrosion-proof all aluminium I-beams.

The Excalibur uses a long lasting 48-volt system to ensure maximum range using industry leading Traction batteries managed by the SEVCON computerized controller. The Hi-output 6 peak horsepower AC motor is powerful enough to move you and your passengers at speeds up to 25 miles per hour (40 KPH) and yet it is efficient enough to deliver a higher range than the industry average. The Excalibur also features an on-board 12-volt converter that gives you an in-dash power source to power you cell phone or laptop computer.

For added safety, the Excalibur has been outfitted with standard headlights, brake lights, turn signals, horn and is the only golf cart to feature a standard 4-wheel braking system, which includes the use of front wheel hydraulic disk brakes.

With all of the standard features that have been engineered into the Excalibur, ACG, Inc. has reset the bar in the Custom Electric Vehicle industry to a level that has never before been seen.

Price:We do not give latest prices, but we are happy to listen to reasonable offers and make every effort to accept them.

Cars Exchange (Cars as part payment):Normally we cannot accept cars as part of payment, but we have many customers looking for different cars, if you send us an email to **sales@cohencars.com** with the information of your vehicle (car photos, copy of the registration, KMs, general condition and defects). We can add it to our database in order to offer it to our customers. We can always make an offer to buy it immediately but will be much less than the market value.

Additional Information:We work much better by Email **sales@cohencars.com** than by phone, but if you prefer to call us, we will be happy to assist you!

“Life is too short not to buy the car you’ve always wanted”
