DESCRIPTION

The Tesla Model X is a car that, in terms of size and interior space, is ideal for family use. It has more multimedia technology than you'd expect in any car.

It's absurdly powerful in a straight line. However, it has to be said that the impression on full throttle is unlike any other car; it's as brutal as it is dizzying for passengers, a sensation worth experiencing at least a couple of times. Plus, you can tell your friends and family that you have the world's fastest SUV in the 0-100 km/h and quarter mile.
